Dimensions

Bio Doser Model #	Height	Width	Depth
Floor BD10-F	15.25" 387mm	13" 330mm	11.5" 292mm
Wall BD5-W	15" 381mm	22" 558mm	5.5" 140mm

How it works

Using an automatic pump, BioDoser meters biological fluid into the kitchen drain system to actively target fats, oils, & grease (FOG) and sugars & soda in beverage lines (SGR) as a food source to breakdown and biodegrade. As a result, organic matter does not build up freeing drains from clogging impediments to flow clearly. An environmentally safe solution.

BioDoser comes in a compact Wall Mount Model fitted to dispense 1.5 Gallons (5.67L) of bio and a sturdy, free-standing Floor Model with fluid capacity of 2.65 Gallons (10L). Both units have automatic pumps programmed for a 28-day replenishment cycle and an option for battery or A/C power. All BioDoser systems are self-service simple, no technician required.
