

Installation Instructions

ScrapBlocker™

The ScrapBlocker locking sink drain guard is as **Easy-to-Install** as **1-2-3**.

Step 1 - Bar in Groove

Using space in drain grooves as entry, place the grooved connector bar with nut facing down into grooves of sink drain. Twist bar along sink groove into position perpendicular to groove openings.

Step 2 - No Twist Bar

Place the second connector bar (without nut or grooves) and snap over bottom connector bar. Ends of bar will reside in sink groove opening thus preventing each base from twisting out of place.

Step 3 - Cover & Bolt Down

Place in the drain guard cover and put bolt through center hole. Take hex key tool and tighten hex bolt to bottom nut. Hand tighten until snug - no need to over tighten. Installation is then complete.
